## FOR A MORE OPEN, INCLUSIVE AND TOLERANT WORLD

Miniland's collection of inclusive dolls aims to help children understand the values of inclusion and community life through play, promoting empathy and acceptance of people of any origin or condition.

### Miniland Dolls international awards

## Discover the collection

Miniland's inspiring doll collection features dolls of different origins to celebrate inclusivity and representation. Showcasing various conditions with love and respect, such as dolls with Down syndrome and dolls with Hearing Implants or glasses, the award-winning collection aims to encourage confidence, acceptance and empathy. With different options available, children are sure to find a doll that's just like them to explore and learn through play.

Each doll is carefully designed with well-defined features, different hair types and textures, and a multitude of skin tones to represent children from around the world.

Their heads, arms and legs are jointed for easy dress-up play and all are anatomically correct.

At Miniland we understand that we live in a colorful world where diversity is a constant reality. The skin color or physical features of a person don't need to be linked to any nationality or geographical area today, but in order to simplify the nomenclature of our dolls in this catalog, we will refer to them as "Caucasian", "Asian", "African" and "Hispanic", understanding that this is the origin of their ancestry and which has given rise to their characteristic phenotypic traits. Always from a perspective of respect and the desire to promote the value of tolerance towards diversity among children.
